# Week-in-Review: At-a-Glance

## Key Highlights

**Advocate Aurora Enterprises announces acquisition of Abry Partners-backed MobileHelp** – Advocate Aurora Enterprises, the investment arm of Advocate Aurora, has announced its acquisition of MobileHelp, a maker of remote medical alert systems. Advocate Aurora Health is an independent non-profit foundation engaged in clinical trials and research studies in the fields of cardiology, neuroscience, oncology, and pediatrics. MobileHelp develops and provides mobile personal emergency systems and other personal health management technologies intended to deliver real-time medical alert monitoring services and expedited personal emergency assistance. The acquisition will allow Advocate Aurora Health to provide complementary solutions to its clinical offerings. This is the fourth acquisition by Advocate Aurora's investment arm thus far, with the goal being to invest in consumer health and wellness companies.

**KKR-backed Clarify Health announces \$150 million Series D** – Clarify Health, a maker of a clinical analytics platform, announced its \$150 million Series D led by SoftBank Vision Fund 2, with participation from Blackrock, Memorial Hermann Health System, Insight Partners, Spark Capital, KKR, Aspenwood Ventures, Rivas Capital and Sigmas Group. Clarify Health is a value-based care company that provides a real-time analytics and a care guidance platform designed to incorporate predictive analytics and machine learning into the design of care delivery models. The Company intends to use the funding for growing its value-based payments technology. To date, Clarify Health has raised over \$350 million.

**IntelyCare announces \$115 million Series C** – IntelyCare, a nurse staffing platform, announced its \$115 million Series. IntelyCare provides an intelligent healthcare workforce management platform designed to assist in hiring nursing and healthcare staff by using artificial intelligence to automate scheduling. The Company intends to use the funding to offer more employment and professional development opportunities for its nurses, including continuing education. The funding round brings IntelyCare's valuation to \$1.1 billion. To date, IntelyCare has raised \$174 million.

**Insight Partners-backed Viz.ai announces \$100 million Series D** – Viz.ai, an artificial intelligence-backed health-tech company, announced its \$100 million Series D funding round led by Tiger Global and Insight Partners with participation from Kleiner Perkins, GV and Scale Ventures, valuing the company at \$1.2 billion. Viz.ai is a care-coordination tool designed to help clinical teams share images and detect potential diseases. The product's AI tool is able to help triage the clinical images and detect strokes, and in turn help care teams prioritize patients. The funds will help fuel growth in the company including adding new disease-triaging capabilities to the Viz Platform. To date, Viz.ai has \$150 million.

**Company Ventures-backed Season Health announces \$34 million Series A** – Season Health, a "digital food pharmacy" company, announced its \$34 million Series A led by Andreessen Horowitz. Season Health allows patients to work out meal plans based on their health needs by pairing them with a dietitian so they can discuss health conditions like diabetes, heart disease, and chronic kidney disease. The Company plans to use the funding to rapidly expand payer and provider collaborations, grow its team and ramp up national retail integrations. To date, Season Health has raised about \$45 million.

# Week-in-Review: Industry and Company News

## Industry and Company News

### Anthem, Biogen, Eli Lilly and Pfizer develop digital endpoint toolkit to guide drug reimbursement decisions

- “The pharmaceutical industry is making progress to incorporate digital endpoints into clinical trials as the industry shifts to decentralized clinical trials and as digital evidence plays a bigger role in drug development. To prepare for the first drug labels and approvals based on data from digital endpoints, the nonprofit Digital Medicine Society partnered with Anthem and major pharmaceutical companies to develop a toolkit to support reimbursement for new drugs developed using digital endpoints. As digital endpoints are used more frequently in the evaluation of new medical products, the field has focused extensively on regulatory acceptance in support of drug approval. In March 2022, the FDA issued draft guidance providing its recommendations on the use of digital health data acquisition in clinical investigations, furthering the widespread speculation that regulatory acceptance is not far ahead, according to DiMe executives. The organization partnered with Anthem, Biogen, Eli Lilly, Evidation, Janssen, Merck, Pfizer and Savvy Co-op to develop a toolkit of resources created to facilitate the inclusion of digital endpoints as evidence for payers in reimbursement decisions for new drugs.” [Fierce Healthcare | 4/4/22](#)

### Epic, Guardant Health team up for precision oncology

- “Guardant Health, which develops technologies for precision oncology, announced a new collaboration with Epic to integrate its portfolio of cancer tests within the Epic electronic health record. Company officials say the new partnership will make it easier for health systems, community providers and retail clinics to provide direct ordering, access and delivery of Guardant Health blood tests. The integration will give physicians access to test results within their clinical workflows so that they can quickly make informed treatment decisions for patients. The collaboration will enable providers to “easily order Guardant Health tests and access results quickly, giving them more time to focus on their patients,” said Helmy Eltoukhy, Guardant Health co-CEO. “The integration of our tests with Epic, which will include Guardant SHIELD, our blood test to screen for early signs of colorectal cancer, will help to increase the scale and adoption of our offerings in both community practices and large health systems.” The integration is expected to be complete in the second half of this year. This isn’t the first precision medicine collaboration for Epic either. This past summer, Foundation Medicine announced a new partnership with the company to integrate its genomic profiling and testing services into the EHR.” [Healthcare IT News | 4/4/22](#)

### Pear to offer substance use PDTs through telehealth partners

- “Pear Therapeutics is launching a program to offer its prescription digital therapeutics for substance use disorder and opioid use disorder, reSET and reSET-O, via telehealth providers. The first telehealth offering working with the prescription digital therapeutic company is PursueCare, which focuses on addiction medicine. Pear said its tool will help patients find providers in their state, including in-person care, to discuss treatment options. It plans to add more telehealth partners in the future. Drug overdose deaths have been generally increasing over the past two decades, with a significant jump during the COVID-19 pandemic. According to the CDC, more than 100,000 people are estimated to have died of a drug overdose during the 12-month period ending in April 2021, a nearly 29% jump compared with the previous year. Pear is pitching its partnership with telehealth providers as a way to increase access to addiction treatment, which is out of reach for many with substance use disorders.” [MobiHealthNews | 4/4/22](#)

## Industry and Company News (Cont’d)

### AI-powered pathology startup PathAI teams up with GSK for drug discovery

- “AI-enabled pathology company PathAI has entered into a multiyear drug discovery partnership with pharma giant GlaxoSmithKline. The agreement will focus on advancing clinical trials and drug development in oncology and for nonalcoholic steatohepatitis (NASH), an aggressive type of fatty liver disease that can lead to serious scarring and liver failure. “Our partnership will combine GSK and PathAI’s AI and platform engineering teams to scale algorithm development and enable the discovery of new insights that can be rapidly integrated into clinical trials,” PathAI CEO and cofounder Andrew Beck said in a statement. This isn’t GSK’s first deal with digital health and health tech startups. The company recently extended its drug discovery partnership with 23andMe until July 2023. That collaboration first began in 2018 when GSK poured \$300 million into the consumer genetics company. PathAI has also been scooping up partners to utilize its tech. In October, the startup entered into a strategic deal with pharma and diagnostics company Roche to develop and distribute its AI pathology tech through Roche’s uPath enterprise software, a workflow platform for labs”. [MobiHealthNews | 4/5/22](#)

### Government Accountability Office asks CMS to assess telehealth quality for Medicaid beneficiaries

- “The U.S. Government Accountability Office is asking the Centers for Medicare and Medicaid Services to gauge the effect that an increase in telehealth utilization is having on the care quality experienced by Medicaid beneficiaries. The GAO cited statistics showing usage continues to rise. GAO culled data from five states – Arizona, California, Maine, Mississippi and Missouri – and found exponential increases in both the number and percentage of services delivered through telehealth, as well as the number of Medicaid beneficiaries receiving remote care. The number of Medicaid beneficiaries using the technology is also on the upswing, with 4.9 million beneficiaries in those five states receiving telehealth services over that time, compared to just 455,000 in the 12-month period prior to the COVID-19 pandemic. The percentage of Medicaid patients receiving at least one service through telehealth increased greatly in all five states, with the greatest increase occurring in Maine: From March 2019 to February 2020, just 2.5% of Maine Medicaid enrollees utilized a telehealth service. From March 2020 to February 2021, that number shot up to 41.8%.” [Healthcare Finance News | 4/5/22](#)

### Aidoc software receives FDA green light for flagging, triaging brain aneurysms

- “Aidoc scored a second FDA 510(k) clearance last month for artificial intelligence software aimed at finding and triaging potential brain aneurysms in CT scans. According to the FDA’s database, the agency gave the green light on the tool around the same time in March as it did Aidoc’s algorithm for flagging pneumothorax, or a collapsed lung, on X-rays. That clearance was announced last week. Aidoc marks this tool as its ninth 510(k). Its other clearances include software for triaging and notifying providers about intracranial hemorrhage, cervical spine fractures, incidental pulmonary embolism, large vessel occlusions and rib fractures. Aidoc’s brain aneurysm software also includes a care coordination workflow that can loop in providers like neuroendovascular surgeons and neurologists. Walach argues that type of communication and coordination with an entire care team is one place where AI can improve outcomes. Founded in 2016, Aidoc said it has raised around \$140 million in total funding. The company’s most recent round brought in \$66 million in July last year.” [MobiHealthNews | 4/6/22](#)

This document is a marketing presentation. It has been prepared by personnel of Solomon Partners or its affiliates and not by Natixis' research department. It is not investment research or a research recommendation and is not intended to constitute a sufficient basis upon which to make an investment decision. This material is provided for information purposes, is intended for your use only and does not constitute an invitation or offer to subscribe for or purchase any of the products or services mentioned. Any pricing information provided is indicative only and does not represent a level at which an actual trade could be executed. Natixis may trade as principal or have proprietary positions in securities or other financial instruments that are the subject of this material. It is intended only to provide observations and views of the said personnel, which may be different from, or inconsistent with, the observations and views of Natixis analysts or other Natixis sales and/or trading personnel, or the proprietary positions of Natixis. Observations and views of the writer may change at any time without notice.

This presentation may contain forward-looking statements and comments relating to the objectives and strategy of Solomon Partners. Any such projections inherently depend on assumptions, project considerations, objectives and expectations linked to future events, transactions, products and services as well as on suppositions regarding future performance and synergies.

Certain information in this presentation relating to parties other than Solomon Partners or taken from external sources has not been subject to independent verification, and Solomon Partners makes no warranty as to the accuracy, fairness or completeness of the information or opinions in this presentation. Neither Solomon Partners nor its representatives shall be liable for any errors or omissions or for any harm resulting from the use of this presentation, the content of this presentation, or any document or information referred to in this presentation.

Nothing in this presentation constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances. Each individual or entity who receives this document or participates in any future transaction shall be responsible for obtaining all such advice as it thinks appropriate on such matters and shall be responsible for making its own independent investigation and appraisal of the risks, benefits and suitability of the transactions as to itself. Any discussions of past performance should not be taken as an indication of future results, and no representation, expressed or implied, is made regarding future results. No person shall have any liability whatsoever (in negligence or otherwise) for any loss arising from any use of this document or its contents or otherwise arising in connection with this document or any other written or oral communications transmitted to the recipient in relation hereto.

Solomon Partners and/or its affiliates, officers, directors and employees, including persons involved in the preparation or issuance of this material, may, from time to time, have long or short positions in, and buy or sell, the securities or derivatives mentioned in this material.

The information contained herein may be based in part on hypothetical assumptions and for certain models, past performance. These assumptions have certain inherent limitations and will be affected by any changes in the structure or assets for this transaction. This material is confidential and any redistribution is prohibited. Solomon Partners is not responsible for any unauthorized redistribution.
